

Point of Sale

The Cashier is a full-featured Point of Sale module that can transform your computer into a fully integrated cash register.

With just a few mouse clicks, an invoice is created, the customer is served and the receipt is printed out.

FEATURES AT A GLANCE

- Commands the cash register devices (cash-drawer, customer display and receipt printer)
- Lets you setup the customer display and receipt printer
- Lets you define the cashier register starting amount either by cash register or by operator
- Lets you define a cashier default startup customer to accelerate cash sales
- Allows user-defined function keys
- Lets you define a maximum in-drawer amount
- Offers you to make a deposit when the maximum in-drawer amount is exceeded
- Accepts multiple payment methods
- Manages sales commission
- Handles layaways
- Allows adding new customers and items on-the-fly
- Gives you access to the customer and item maintenances directly within the register
- Lets you access several warehouses to check an item's availability
- Warns the operator when a customer has layaways
- Lets you print large-format invoices
- Lets you change the invoice layout
- All the information you need is grouped on one screen for quick data entry

REPORTS AVAILABLE

- End-of-Day Balance by Operator
- End-of-Day Balance by Cashier

SCREENSHOTS

The register

The register lets you use shortcuts to accelerate the invoicing process.

Reports

The Cashier's reports provide information about your daily sales figures, either by operator or by cash register.
