

CASE STUDY

DYNACOM PROVIDES THE MOST COMPLETE AND ADAPTABLE ENTERPRISE APPLICATIONS FOR THE TRANSPORTATION INDUSTRY.

One of the broadest Enterprise suites on the market, with a wide variety of functions that make it suitable for all-sized businesses, Dynacom Enterprise solution offers management tools that adjust to your specific business needs, ensuring that you're making decisions based on your reality as you adapt to growth.

DYNACOM

THE CHALLENGE

Recy-compact first mandated an external firm to develop a set of custom management tools to assess the costs and performances related to its waste disposal and recycling operations as well as its dumpster rental and vehicle maintenance activities.

The development process was not fast enough and the solution provided by the third-party was incomplete and lacked robustness. In addition to understanding the business reality of Recy-compact, the first step in meeting the challenge was to integrate and bring the initial solution to high quality standards and afterwards to develop the many add-ons necessary for a full implementation of the solution.

THE SOLUTION

Dynacom offered to take over the solution in its current state and make it 100% compatible with the Enterprise SQL Edition of its flagship software, Dynacom Accounting, along with improving its efficiency and robustness.

Once the solution was finalized and implemented at Recy-compact's site, the next step was to start analyzing, developing and integrating the additional add-ons required by Recy-compact's managers to fully monitor their entire operations.

The solution developed by Dynacom and implemented at Recy-compact head-quarter now allows them to identify internal processes that require consolidation or optimization thus achieving substantial economies of scale.

THE BENEFITS

In the past, when Recy-compact wanted to respond to invitations to tender, they used to make assessments using Excel documents and those assessments could take several days. Today, using the custom solution developed by Dynacom, Recy-compact managers can respond to invitations to tender in a few seconds, creating additional wealth rather than wasting time gathering information.

Why Choose Dynacom? -- Key Benefits

- Rapid and simple installation and deployment
- Offers unparalleled customization capabilities
- Supports growth no matter the business needs
- Backed by a dedicated and experienced team of developers that can deliver quality solutions in a timely manner

About Recy-compact

A Dynacom's client since its foundation in 1996, Recy-compact is a Quebec company based in St. Blaise and a member of the CESE, specialized in the field of waste disposal and recycling operations at both commercial and municipal levels.

About Dynacom Technologies

Founded in Canada in 1990, Dynacom puts its knowledge and experience to develop innovative management software solutions that can be easily customized to meet the needs of any type of business. Dynacom is actively pursuing its international growth, relying on its network of resellers serving the needs of 250,000 businesses from all around the world.
